

# International Section : Year 8 – eTwinning project with Year 8 class of Mrs H. Bainbridge, Collège J. Monod, Les Pennes-Mirabeau (13170)

Between December and March, we explored the different stages of our project with our partner school in Pennes-Mirabeau.

First, we got to know each other thanks to videos introducing ourselves followed by a quiz! We had to pay attention to the clues and information we were giving (some true and some false) and those given to us by our partners 😊

Once we were fully acquainted, we were told about our coming mission into SPACE: Rocketship 2022!

It sounded exciting: Imagine we took part in an intergalactic flying school! Applying for positions in the school, planning the itinerary of the rocket, learning about the tasks of the different members of a space mission, what we would like to do or rather not try! 😊 Researching the necessary documentation about space and the solar system and finally taking off to fly to a distant planet and discover maybe not only planets but other life forms...? Just like the ones described in the science fiction stories of Ray Bradbury, which we read and used to create our own Black out poetry. Such inspired, we were then able to study soundscapes with M. Louail, our music teacher, create our own and use it as a background to the reading of our own science fiction story. It was fun and we learnt to do things we didn't know we could do.

Year 8.
